CQWW SSB CONTEST

This coming weekend sees one of the biggest DX contests of the year – CQWW SSB. Even if you're not a contester, there's usually something "juicy" to work on the bands, especially now sunspots and solar flux are generally higher than previous years.

If participating in the CQWW (SSB or CW) let **ADXO** know. Alternatively, keep an eye on that list nearer the time to see which DX stations will be on the bands before, after and during the contest.

Meanwhile, here's the **rules**.

DX News

FP5KE Saint-Pierre & Miquelon -update

We are experiencing some issues with the FP5KE log. Based on your correction requests, we noticed that some bands were recorded incorrectly. This happened when we shut down the stations to switch between generators. After restarting, the CAT control did not always reconnect properly and some QSOs were logged on an incorrect band for a period of time. We are still working on corrections (thanks to Jean-Luc, F1ULQ for this hard work) and the opening of OQRS is slightly delayed. [FP5KE – Saint-Pierre & Miquelon | DX-World](#)

PJ6Y Saba -update October 22

We are extremely pleased with the continued amazing propagation on all bands, with 20 and 17 meters open around the clock!

We are experiencing great openings on 160 and 80 to Europe, as well as good openings on 80 to JA, shares Gregg W6IZT. With good conditions on the low bands, we will focus on 160 and 80 during the evening hours. Yesterday afternoon we put approximately 50 stations in the log on 6 meters from NA, SA, and EU.

We are very fortunate to have a stellar operating location on the island. However, it is a relatively small site, and we feel that we are making the most of the limited area that we have to work with.

J38W Grenada -update

I am thrilled to announce that preparations for my upcoming DXpedition to Grenada, designated as J38W, are well underway. With just 33 days to go until my departure, I've ramped up my preparations in recent weeks.

My journey began in the picturesque Shropshire countryside, where I dedicated a day to set up the masts I intend to use. I meticulously arranged the guy ropes and laid the foundations for the antenna itself. I am happy to share that the hex-beam has been successfully erected and is ready for operation. <https://www.dx-world.net/j38w-grenada/>

XF4 Revillagigedo -update

Mark, XE1B will be returning to Revillagigedo for a short visit to meet the new base commander and set the conditions for an international team with remote capabilities for the future. Access to the base is severely restricted and only via a Navy battleship making supply runs from Baja, Mexico. The next Navy trip is scheduled for a 23 October departure from Socorro and a return on the 30th of October. That will allow Mark a 5 day window of operating (it's a 36 hour trip). Mark is a 3 time veteran of trips there, having activated XF4 in 1999, 2011, and 2018. He has a new license for this trip (the callsign will be released when he is QRV). He also has permission from the Navy and the other two regulatory agencies to visit the island and operate.

3Y0K Bouvet Island -update by Ken LA7GIA

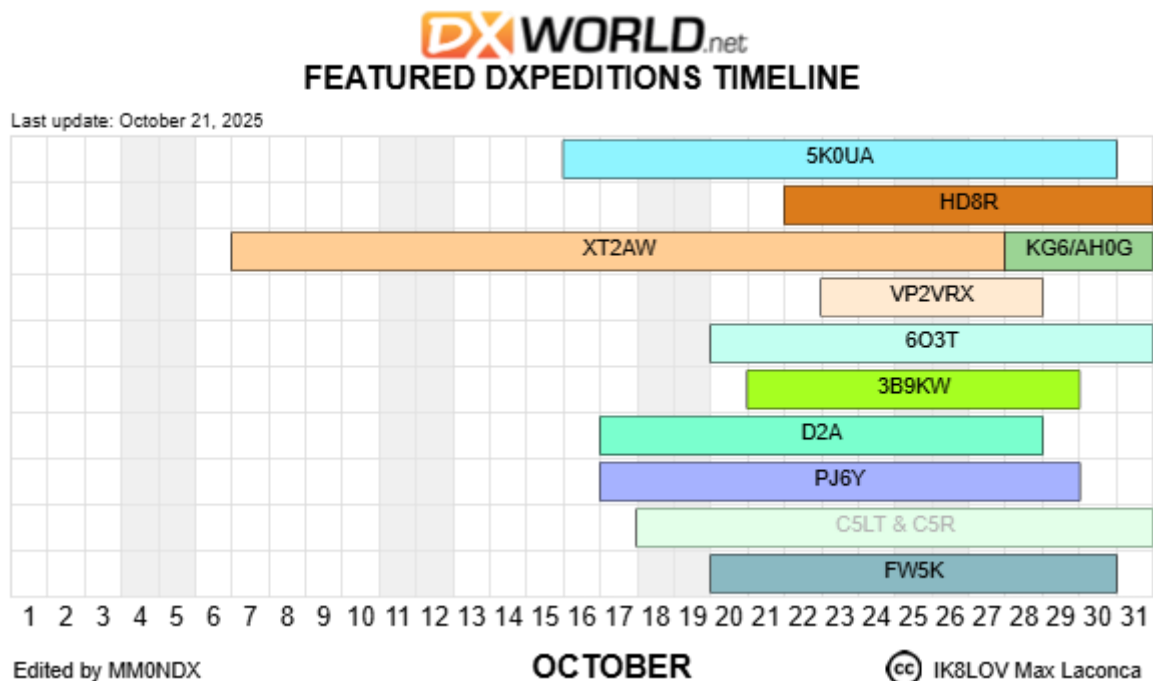

The 3Y0K container is currently en route to Cape Town, with an expected arrival in late November. Our team is now fully focused on preparations for the February 1st, 2026 departure. This includes a series of planning meetings to finalize logistics and camp setup—our top priority at the moment. Next month, we'll be making the final vessel deposit of approximately \$500,000. By that point, our total investment in this DXpedition will exceed \$1.5 million. Every contribution helps us manage the significant costs involved, and donations are gratefully accepted via PayPal at donate@3y0k.com to help offset some of the team cost. <https://www.dx-world.net/3y0k-bouvet-2026/>

FW5K Wallis & Futuna -update October 20

All FW5K logs so far uploaded to Club Log. Please check all QSOs before attempting to work us again and creating dupes. The internet is slow with many interruptions, so not all QSOs are uploading immediately. Please allow 24hrs to update logs and check Club Log. EU is a priority to FW5K and we will try to operate on low bands in the most convenient time as possible.

KH2, GUAM

T8, PALAU

V6, MICRONESIA

V7, MARSHALL ISL

'October 25th I will head to Tokyo and from there to Guam, hoping to meet some of the local amateur radio community. Next stop will be Palau, Micronesia and the Marshall Islands. Chances of finding an affordable HF location on the islands are very limited. The prices per night are exorbitant like in the Caribbean and an S9 QRM level is guaranteed on most locations. Therefore, I will also operate portable or out of a car. The advantage is having a good location near the sea, but the disadvantage is that I have to build up and take down my antennas every day...That is why my operation will not be 24/7... It will be a mixture of DXpedition, antenna experimenting and meeting local radio amateurs. Yes, I will try the low bands and of course 60m CW, where allowed. I'm looking forward to meeting you! Every QSO will be "hand made" with an ETM9c keyer – it will be an old school DXpedition.' <https://www.roody.de/>

3B9, RODRIGUES ISL Kazu M0CFW is again active as 3B9KW until October 29 and the CQWW CW contest (November 29-30). Before and after he will be active as 3B9/call between November 23 and December 1. QSL via LoTW.

5H, TANZANIA Maurizio IK2GZU is once again active as 5H3MB until November 20. He returns as a volunteer in the Ikelu hospital in the South Highlands. Operation during his spare time on HF using CW, SSB and digi. QSL via home call, LoTW, Club Log.

5R, MADAGASCAR The Italian Dxpediton Team led by Silvano, I2YSB announce a new activity from Madagascar (Nosy Be, IOTA AF-057) during October 29 and November 12 as 5R8TT (CW, SSB and RTTY) and as 5R8XX (FT8). A team with I1FQH, I1HJT, I2PJA, IK2CKR, IK2HKT, IK2RZP, IV3ZXQ and I2YSB will be operating with 4 stations from 160 to 6 meter. QSL via I2YSB.

VP2V, BRITISH VIRGIN ISL Seth, N4XTT and a team of young operators will be active as VP2VRX during the CQWW SSB contest. This operation features a team of operators (W3MLJ, KC1KUG, N4XTT, K4BEN and KC3VPB), all in their late teens and early twenties, who bring energy to DXpedition activities. The group has been planning this operation for many months, coordinating equipment, antennas, and logistics for a memorable and fun operation for both the team and the stations they work.

The timing works out well with the CQ Worldwide SSB Contest happening that weekend, which will bring lots of participation from stations worldwide. The plan is to start things off with a few days operating as NP2R from the US Virgin Islands (October 20-22); allowing the team to test equipment before moving over to the British Virgin Islands for the main VP2VRX operation during the contest (October 23-28). They'll be running multiple stations simultaneously during the contest. Outside the contest, the operators will each be active as VP2V/call on various modes/bands.

SA-070 Isla Santa Maria 3G5SM will be active during November 10-14. The operation will also serve as a trial run of the equipment - including a remote station - to be used during XQ7IR's announced DXpedition to San Ambrosio in January 2026 together with Moises CE3VTZ and Manu CE3YMR. Only contacts made with the on-site 3G5SM operator(s) will be accepted for IOTA credit. Those contacts will include SSB QSOs (10-14 November) and FT8 QSOs (10-12 November). Any CW and FT8 contacts made between 00:01 UTC on 13 November and 23:59 UTC on 14 November will be carried out remotely, and will not count towards IOTA credit. <https://3g5sm.webnode.cl/>

About Isla Santa Maria:

The island is located in the south central part of Chile, about 550 km south of Santiago, Administratively, it belongs to the municipality of Coronel in the Bio Bio region, but is located a few dozen kilometers away on the Pacific Ocean that separates it from the mainland. Nearly 2,200 people live in its lush vegetation, wetlands, cliffs, and sandy beaches, inhabited by the Mapuche before Spanish colonization. There are no roads, no heavy vehicular traffic, and no industrial pollution from the cities. Only artisanal fishing and subsistence farming exist.

Santa María Island is an excellent birdwatching destination, a unique refuge for birdlife. Numerous species can be observed on the island, such as the Pilpilén, the Field Plover, the Snowy Plover, and pelagic seabirds.

Vostok base by Alex UG1A

— Progress Base: October 20 – December 5.

— Traverse Progress Base to Vostok Base: December 5-20 (possible CW activity during the traverse)

After Vostok, says Frank, there's a possibility that Alex will go to Ridge B and operate from there. Nothing is certain about that yet so more info later. However, it would be an ATNO for the Worldwide Antarctic Program (WAP) and Polar DX Challenge as Ridge B has never been activated before.

A new callsign have been assigned to Alex for all operations during this season: RI1ANI.

Since 2007, Alex was very active from Progress and Vostok base, mostly in CW but also in SSB with many calls such as R1ANC, R1ANP, RI1ANC, RI1ANV, RI30ANT.

NOTE: Ridge B is one of the least studied areas in Antarctica but has been considered to be a potential location for the oldest ice on Earth. In January 2020, the first scientific traverse from Russia's Vostok Station to the topographical dome of Ridge B was carried out. Ridge B (Dome B) is 3807m above sea level, 79.02°S, 93.69°E).
